Government Projects: Low Code - No code Approach, Data-Driven, Stakeholder-Centric

RASED Project (Excise Department)

Pirivenas & Bhikku Education Project (Education Ministry)

Management System & Data ware housing for ISPP (Department of National Planning)

National Payroll system

Public Transportation System (National / Regional Transport Digital Platform)

National Disaster Management System (2025)

- Supported Agile delivery across software, data and digital transformation projects using Scrum and Jira.
- Assisted in designing and developing software solutions while contributing to coding, testing, and debugging activities.
- Supported project planning, scheduling, and task tracking to ensure timely delivery of development milestones.
- Collaborated with developers, designers, and stakeholders to gather requirements and translate them into functional features.
- Monitored project progress, identified risks or delays, and helped implement corrective actions to keep projects on track.
- Maintained documentation, including technical specifications and project reports, to support transparency and knowledge sharing.
- Participated in UAT, business validation, issue tracking, and project documentation to support successful implementation and rollout.
- Promoted continuous improvement through process reviews, stakeholder feedback, and delivery coordination across teams.
- Gained exposure to multi-stakeholder, large-scale delivery environments, including platform-based and public sector transformation projects.

Soft Skills –

- Communication
- Attention to detail
- Adaptability
- Collaboration & Team work
- Problem Solving
- Critical Thinking
- Flexibility

Projects

University
